IDENTIFIERS South Carolina

ABSTRACT

To follow up an initial statewide computer survey (1983-84), the State Department of Education conducted an investigation of microcomputers and their use in elementary, middle, and secondary schools in South Carolina. The survey was conducted in two phases: an inventory of computer equipment was taken as a component of the Statewide Basic Educational Data System (BEDS) Survey, and a questionnaire, dealing with questions on instructional and administrative uses of computers, funding, and software inventory, was distributed to the 1,120 schools and 92 school districts that participated in the first survey. A total of 1,082 school and 88 district forms were received for a response rate of 97% and 96% respectively. The survey showed that: (1) the total number of computers in schools increased from 4,054 to 6,400 (58%), with 25 brands and 63 models of computers represented; (2) a total of 911 schools now have computers; (3) the student-to-computer ratio improved to 1:94 from 1:149 for the previous year; (4) 54% of the schools have one or two computers, and 14% report having 10 or more computers; (5) Apple remains the most popular computer for instructional purposes, with 3,290 distributed throughout the schools; (6) total funds spent for computer hardware and software almost equaled that spent over the 4 previous years; and (7) the Department of Education Basic Skills Assessment Program (BSAP) Correlation Mathematics Software listing was considered by a majority of schools (62%) in making software purchases. Additional data are provided on the instructional and administrative uses for which computers are employed in the schools of 88 of the state's 92 districts by grade and brand and model of equipment. Instructional and Administrative Uses of computers and Future Plans by School District	11

Introduction

The 1984 computer survey is the second statewide computer survey by the State Department of Education. A comparison of data from the 1983-84 Statewide Survey is provided where appropriate giving indications of trends useful for decision making by educators in the use of technology. The survey covered the period of January 1, 1984 to December 31, 1984.

Survey Design

The survey was conducted in two phases. An inventory of computer equipment was taken as a component of the Statewide Basic Educational Data System (BEDS) Survey during September. A second questionnaire dealing with questions on instructional and administrative uses of computers, funding and software inventory for January 1, 1984 - December 31, 1984 was completed during March 1985. All 1,120 schools and 92 school districts were sent survey forms.

Response Rate

All forms for both school and school district offices were received for the Fall computer survey. For the Spring survey, a total of 1,082 school and 88 district forms were received for response rates of 97 and 96 percent, respectively.

Survey Highlights

Major findings from the survey include:

- The Department of Education BSAP Correlation for mathematics was a strong factor in decisions by 561 out of 907 schools or 62 percent, in buying software.

- 1984 was a year in which the total amount of money spent for computer hardware and software by district offices and schools was nearly equal to that spent for the previous four years:

1984:	$8,843,275
1979-83:	$9,525,561

- The top five computers in our schools, their quantities and the amounts of change over last year for each were:

Apple	3,290	(79%)
Radio Shack	1,218	(34%)
Texas Instruments	575	(19%)
Commodore	561	(64%)
IBM	247	(119%)

SURVEY RESULTS

I. September 1984 Computer Equipment Inventory Survey:

A. District Office Survey

A total of 234 computers comprising seven brands and 23 models are located in school district offices. (See Table 1 on page 7 for listing)

B. School Survey

The total number of computers in schools increased over the past year from 4,054 to 6,400, a 58 percent increase, with 25 brands and 63 models of computers represented. The number of computers by major brand, percent by brand of all computers and percent change by brand over last year are given in the table below. A total of 911 schools now have computers. The student to computer ratio improved to 1:94 compared to last year's 1:149. Fifty-four percent of the schools only have one or two computers. One hundred thirty-one schools, or 14 percent, report having ten or more computers. (See Tables 2 and 3 on pages 8-9, and 10 respectively.)

Main Computer Brands:

Brands of Computers	1984	1983	Percent of All Computers	Percent Change
Apple	3,290	1,833	51%	79%
Radio Shack	1,218	906	19%	34%
Texas Instruments	575	482	9%	19%
Commodore	561	343	9%	64%
IBM	247	113	4%	119%
Atari	240	174	4%	38%
Others	269	203	4%	33%
Total	6,400	4,054		58%

II. 1984 Instructional and Administrative Uses, Software and Funding Survey taken March, 1985):

A. District Computer Survey

Over a third of the school district offices (35) plan to purchase computers for instruction, while over half (45) plan to buy them for administrative purposes. The table below indicates the reponses by total number of districts to questions on current and planned uses and purchases of computers.

DISTRICT COMPUTER SURVEY

Instructional Use Of Computers	(Total Districts Responding: 88)	
	Total Yes	Percent Yes
1. Use district computers for instruction	22	25
2. Use district computers for staff development	26	30
3. Plan to buy computer(s) by 1985-86?	35	40
4. Initial purchase for no. 3?	8	9
Administrative Use Of Computers	**(Total Districts Responding: 85)**	
5. Use computers for administration	67	79
6. Plan to buy computer(s) by 1985-86?	45	53
7. Initial Purchase for No. 6?	11	13

Funds Spent on Computers in 1984

	Instructional Uses	Number Districts	Administrative Uses	Number Districts	Subtotals	
8. For Hardware:	$1,797,256	47	$ 798,866	51	$2,596,122	(85.40%)
9. For Software:	221,407	47	222,344	49	443,751	(14.60%)
	$2,018,663		$1,021,210		$3,039,873	

Administrative Applications and Priority of Use:

The top administrative applications of computers and the number of districts reporting each were payroll (21), word processing (20), internal accounts (17), personnel (14) and student records (11).

Optical Scanners and/or Card Readers Used:

The top machines used and the number of districts for each were Tru-Data (13) and Chatsworth Data Corporation (12).

B. School Computer Survey

The Department of Education BSAP Correlation Mathematics Software listing was considered by a majority of schools, 561 or 62 percent, in making software purchases during 1984.

The data below presents a summary of the number of schools responding to questions of usage and funding.

SCHOOL COMPUTER SURVEY

Instructional Use of Computers	(Total Schools Responding: 907) Total Yes	Percent Yes
1. Use computers for instruction	734	81
2. Plan to buy computer(s) by 1985-86?	523	58
3. Initial purchase for Question Number 2?	80	9
4. Did BSAP Correlation contribute to purchase decision?	561	62

	1984-85	1983-84
5. Number of staff members computer literate	9,044 (25%)	5,211 (14%)

6. Number of BSAP Software packages now in school inventory:

Subject Area	Quantity	Total
Mathematics	3,152	3,152
Language Arts		
-Reading	1,112	
-Writing	1,503	
-Word Processing	615	3,930
		6,382

Administrative Use of Computers	(Total Schools Responding: 872)	
7. Use computers for administration	331	38
8. Plan to buy computer(s) by 1985-86?	294	34
9. Initial purchase for Question Number 7?	95	11

Funds Spent on Computer in 1984

	Instructional Uses	Number Schools	Administrative Uses	Number Schools	Subtotals	
10. For Hardware:	$3,659,535	541	$1,060,534	238	$4,720,069	(81.33%)
11. For Software:	617,968	600	465,365	290	1,083,333	(18.67%)
	$4,277,503		$1,525,899		$5,803,402	

Instructional Software Used by School:

A. Mathematics

Schools were asked if they had copies of the Math BSAP Correlated Software. The number of schools reporting having individual program titles ranged from one to 244. The five programs most frequently in school inventories were Sell Lemonade (244), Bagels (242), Problem Solving Strategies (240), Adventures with Fractions (220) and Growgin's Fractions (212). Seventy-seven percent of the responses indicated that the math BSAP software programs were not owned prior to May 1983. This provides strong support to the premise that the Department's Math BSAP Correlation Software listing was an important factor in schools buying this recommended software. Schools indicated that they have purchased at least 3,152 mathematics BSAP-correlated software packages.

B. Reading/Writing

The top reading and writing programs owned by schools are all distributed by the Minnesota Educational Computing Consortium (MECC) and are:

Title	Quantity	Publisher
	READING	
Elementary Volume 5	256	MECC
Word Herd-Look Alike	129	MECC
Word Herd-Sound Alike	129	MECC
	WRITING	
Spelling, Volume 1	260	MECC
Spelling, Volume 2	215	MECC
Master Spell	167	MECC
Word Wizards	167	MECC
Writing a Narrative	149	MECC

Administrative Applications and Priority of Use:

The top five administrative applications of computers and number of schools were FTE student accounting (328), scheduling (193) word processing (128), grade reporting (126) and personnel (121).

Optical Scanners and/or Card Readers Used:

Schools reported using 375 Chatsworth Data Corporation machines in 57 schools, 60 Tru-Data machines in 55 schools and 23 Scantron Corporation units in 23 schools.

C. Comparison of District Office and School Survey Data

The total amount of funds spent during 1984 for computer hardware and software was $8,842,575. The table below presents the amount of expenditures for hardware and software, for instructional and administrative uses for both district offices and schools:

1984 COMPUTER EXPENDITURES

	Hardware		Software	
	Instructional Uses	Administrative Uses	Instructional Uses	Administrative Uses
District Offices	$1,797,256	$ 798,866	$ 221,407	$ 222,344
Schools	3,659,535	1,060,534	617,968	465,365
	5,456,791	1,859,400	839,375	687,709
	$7,316,191 (82.73%)		$1,527,084 (17.27%)	
	$8,843,275

Instructional and Administrative Uses of Computers and Future Plans

by

School District

The information provided in this section of the report provides an overview of the instructional and administrative uses to which computers are employed in schools of 88 of the state's 92 school districts by grade and brand and model of equipment. A brief description of future uses is included where districts provided this information. The total number of computers and printers by brand and model employed in CAI/CMI and administrative uses is identified.

This information is recommended as a reference for school district administrators and and other educators desiring to compare or explore applications of computers between school districts of the state.

Explanation of Terms:

A. Instructional uses of computers in district schools

Instructional Uses: This column is a listing of subject areas in which computers are used. Use as a "Tool" equates with uses for word processing, data base management or for spreadsheets.

Grade: Indicates the grade level or grade range in which each brand and model is employed for various instructional uses.

Brand/Model: Identifies the computers used at each grade level for each particular instructional use.

Descriptions: Responding districts provide the additional information on use by broad grade range, ie., elementary, middle/junior and secondary schools.

B. Administrative Uses: Applications of computers to fulfill such uses as record keeping and reporting at individual schools.

Level: Indicates the broad range of grades for which each particular brand and model is employed for each administrative use.

Description: Districts provide here additional information on use by broad grade range, ie., elementary, middle/junior and secondary schools.

Future Plans: Districts provided a brief description in tabular form of future applications of computers by grade level to include remarks on projected purchases and training plans.

The total number of computers for all the districts' schools and their use for CAI/CMI and administration are given. Total printers are also given.
